

I am writing to inform you on how Air 1 serves me as a resident of my community. Air 1 serves me as a resident of my community because it is different from all other stations on the radio, it has positive and uplifting message as well as music. I like the fact that I can listen to Air 1, hear the word of God preached on the radio as well as young and modern artists singing good Christian music. I also like the fact that I never have to worry about hearing inappropriate language or DJ's talking about or encouraging inappropriate subjects. I can listen to Air 1 with young children in the car or at home and do not have to worry about what they will hear and repeat.

If Air 1 were to be removed from the radio the effect on my local community would be terrible. There are many listeners who listen to Air 1 when they are feeling down, when they want to hear support, and best of all, when they get tired of listening to the same old negative message on the other stations. I especially love to hear the music, the positive DJ's and even the "verse of the day."

For these reasons I believe it is in the public's best interest to maintain Air 1 on the radio. It is the only modern, young and positive station on the radio that sends out a good message. For many, it is a last hope. For me personally, I would feel a void in my daily life if I were to lose Air 1, it really means that much to me and my family.
